## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, drawn to a process for producing a compound of formula 2 classified in class 562, subclass 512+.
- II. Claims 8 and 9 drawn to a process for producing 3-(3-hydroxy-4-methoxyphenyl)-3-methylbutyric acid classified in class 562 subclass 512+.
- III. Claims 10 and 11 drawn to a process for producing 3-(3-hydroxy-4-methoxyphenyl)-3-methylbutyl aldehyde classified in class 568 subclass 420+.
- IV. Claims 12 and 13 drawn to 3-(3-hydroxy-4-methoxyphenyl)-3-methylbutyl aldehyde acid classified in class 568 subclass 420+.
- V. Claims 14 and 15 drawn to a process for producing a specific phenylalanine methyl ester classified in class 560 subclass 129+.
- VI. Claim 16 drawn to a process for producing a specific phenylalanine methyl ester classified in class 560 subclass 129+.
- VII. Claims 17-24 drawn to compounds classified in class 562 subclass 512+.

Inventions I-VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In

Art Unit: 1621

the instant case the different inventions have different functions or different effects, i.e., the products or reagents of the groups are mutually exclusive.

Inventions I-VI vis-a-vis VII are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the compounds can be made by other processes, see specification, page 2.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for some of the groups is mutually exclusive, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
